

CONSTRUCTORA CONCRETO DECREASES ITS CONSOLIDATED INDEBTEDNESS BY COP 210.000 MILLION BETWEEN 2017 AND Q II 2019

- The Consolidated Income as of QII 2019 amounted to COP 417.000 million
- The business segment that most contributed to the Ordinary Income was Construction, with a volume of COP 312.000 million.
- The EBITDA amounted to COP 105.000 million, representing a 25.2% margin
- The business segment that most contributed to the EBITDA was Investments, for a value of COP 71.000 million.
- The Company made the liquidity generated by the operation and the divestment strategy available to meet its investment and financial sector commitments.
- Noteworthy is the reduction of the Consolidated Financial Liability by COP 120.000 million, compared to December 2018.

The QII 2019 results are a reflection of the Company's financial strategy, aimed at profitability, liquidity and equity strength.

At the close of the Second Quarter of 2019, the following events stand out:

- The CCC Ituango Consortium fulfilled the objective of taking the Hidroituango reservoir to the elevation of 435 meters above sea level (masl), its maximum height. This is one of the most important milestones for the safety of the communities downstream from the project. The summit will be the road to the municipality of Ituango. This work is in consortium for EPM.

The Consortium signed Addendum Number 36 with EPM, in which the contract was prorogated for 12 months.

- On June 12, 2019, the payment of the syndicated credit financial obligations for the amount of COP 49.570 million, corresponding to the early payment of the balance of Capital Payable in December 2019, was made. Considering the early payment made in March 2019, early payments to the syndicated credit – amounting to COP 92,834 million – have been made so far this year.
- On June 12, we proudly received the recognition for *Contree* as the Best Vertical Housing Project during the celebration of the LADI awards, a Latin American event that seeks to highlight innovation, development, architecture and marketing applied to the real-estate industry.
- The construction of the *Logika* Gate using the 3D large-format concrete printer
