

CONSTRUCTORA CONCONCRETO S. A.

States that:

Giving scope to the information reported yesterday, regarding the signing of the "Sponsor Support and Subordination Agreement," we wish to clarify that – in its capacity as sponsor of the Bogotá – Girardot Third Lane Project – the Company undertakes to carry out some equity contributions in favor of the Project, and must, likewise, establish the necessary bank guarantees to guarantee its compliance. The final amounts and, consequently, the obligations to make the indicated contributions will be determined at the time of verifying the Financial Closure of the Project.

Notwithstanding the foregoing, we state that these obligations are within the Company's financial capacity, taking into account that most of these commitments have already been contributed to the Project and the remainder will not be a significant figure, by virtue of the lower stake that the Company will have in the Concessionaire as previously reported in this medium. Finally, we state that this type of contractual provisions is absolutely standard within the long-term financing of infrastructure projects such as the one mentioned.
